## Battery tank pop up v.A - VTZ\_TI\_BAT

The new Battery tank pop-up v.A provides a wide range of options in training shooting at large target.

Thanks to its more compact dimensions, battery power supply and RF communications, it can be placed anywhere in the field without the need to connect power or communication wires. The device can be operated together with other Terčot devices via tablet up to a distance of 4 km. This allows the user to compile any exercise based on his needs. The mechanical design consists of high-quality durable steel parts (IP65).

### Versatile usage

- Support for any 60 kg target
- Mobile unit
- Possibility of remote control by tablet
- Powered by external combined battery box

### Accessories

- Integrated shot detector
- Illumination and shot imitation outputs
- Detonator, safflower and smoke shell connection
- External infrared remote controller
- Bluetooth / RF convertor for tablet based control
- External battery charger

### Easy to use

- Flexible placement
- Without any cable infrastructure building
- Control via handheld devices
- Compatible with Terčot devices
- Integration into the classic wired systems
